The LN Series Remote Input/Output (I/O) Modules extend the capability of the LN Series system as well as monitor and control various Heating, Ventilating, and Air Conditioning (HVAC) applications.

The LN Remote I/O Modules are based on LONWORKS® technology for interoperability and peer-to-peer communication between controllers without any intermediary. This configuration also facilitates seamless integration into the Metasys® system.

LN Remote I/O Module Overview
You can configure the Remote I/O Module by using LNS based software, such as LN-Builder. The LN-Builder configuration interface is designed to simplify the configuration of input and output properties, for example, input types, input minimum/input maximum values, output types, and network variable types.

LNS LN-Configure Plug-in
This powerful and intuitive LNS plug-in provides customization of hardware I/O, control sequences, and communication schemes.

Easily configure all of the devices' parameters, including inputs, outputs, heating and cooling set shedding, flow calibration, frost protection, slave operation mode, points, variable airflow, and PID control loops. You can also enable and configure built-in features such as load shedding, flow calibration, frost protection, and slave operation mode.

Dimensions
Figure 2 shows the dimensions for the LN-IO301-1 module. Figure 3 shows the dimensions for the LN-IO401 and LN-IO520-1 modules.

Figure 2: LN-IO301-1 Module Dimensions, mm (in.)
Output Configuration and Remote I/O Controller Selection Guide

The LN Remote I/O Modules comprise three different devices, each having its own output configuration, but all having identical input, power, environmental and general specifications.

| **Power Requirement**        | **Voltage**: 24 VAC/DC; ±15%, 50/60 Hz, Class 2  
                             Protection: 1.35 A auto-reset fuse 
                             Power Consumption: 6 VA 
                             Maximum Consumption: 15 VA |
| **Environmental**            | Operating Temperature: 0–50°C, (32–122°F) 
                             Storage Temperature: -20–50°C, (-4–158°F) 
                             Relative Humidity: 0 to 90% noncondensing |
| **General**                  | Processor: Neuron® 3150™, 8 bits, 10 MHz 
                             Memory: Nonvolatile Flash 64k (APB application), Nonvolatile Flash 64k (storage) 
                             Media Channel: TP/FT-10; 78 Kbps 
                             Communication: LonTalk® protocol 
                             Transceiver: FTX-1 
                             Channel: TP/FT-10; 78 Kbps 
                             Status Indicator: Green LED: power status and LON TX 
                             Orange LED: service and LON RX 
                             Communication Jack: LON audio jack mono 1/8 in. (3.5 mm) |
| **Enclosure**                | Material: ABS type PA-765A 
                             Dimensions (with screws): LN-IO301-1: 5.7 x 4.7 x 2.0 in. (144.8 x 119.4 x 50.8 mm); 
                             LN-IO401-1/520-1: 7.7 x 4.7 x 2.0 in. (195.6 x 119.4 x 50.8 mm) 
                             Shipping Weight: LN-IO301-1: 0.77 lb (0.35 kg), LN-IO401/520: 0.86 lb (0.39 kg) |
| **Inputs**                   | Quantity: universal (software configurable) 
                             Input Types: 
                             Digital: Dry Contact 
                             Analog Voltage: 0 to 10 VDC 
                             Analog current: 4 to 20 mA with 249 ohms external resistor (wired in parallel) 
                             Resistor Support: 
                             Thermistor: Types 2, 3 (10k ohms at 25°C; 77°F) 
                             Range: -40 to 150°C, (-40 to 302°F) 
                             Platinum: Pt1000 (1K ohm at 0°C; 32°F) 
                             Range: -40 to 150°C, (-40 to 302°F) 
                             PT100: (100 ohms at 0°C; 32°F) 
                             Range: -40 to 135°C; -40 to 275°F 
                             Potentiometer: Translation table configurable on several points 
                             Input Resolution: 16 bit analog/digital converter |
| **Electromagnetic Compatibility** | CE: Emission: EN55022: 1998 class B 
                             Immunity: EN61000-4-2: 1995, level 3 in air 
                             EN61000-4-2: 1995, level 2 by contact 
                             EN61000-4-3: 1996, level 2 
                             EN61000-4-4: 1995, level 2 
                             EN61000-4-6: 1996, level 2 
                             ENV 50204: 1995, level 2 
                             FCC: This device complies with FCC rules part 15, subpart B, class B |

1. All materials and manufacturing processes comply with the directive on the Waste Electrical and Electronic Equipment (WEEE).

The performance specifications are nominal and conform to acceptable industry standard. For application at conditions beyond these specifications, consult the local Johnson Controls® office. Johnson Controls, Inc. shall not be liable for damages resulting from misapplication or misuse of its products.

North American Emissions Compliance

United States

This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when this equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his/her own expense.

Canada

This Class (A) digital apparatus meets all the requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la Classe (A) respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

The term IC before the certification/registration number only signifies that the Industry Canada technical specifications were met.
