V11 Series
Three-Way Solenoid Air Valve

Application
V11 three-way valves are for use in applications where the operation of a pneumatically operated device is dependent upon an electrical circuit. The valves direct supply air to the pneumatic device when the coil is energized or de-energized, depending on the supply and exhaust air connections.

**General Description**

The solenoid air valve is furnished for two-position action and has three identified connections: a normally open (N.O.) port with 1/8 in. FNPT connection, a normally closed (N.C.) port, and a common (COM) port with 1/4 in. barbed fittings.

The ports in the die cast aluminum valve body have No. 60 mesh (217 micron openings) monel screens to avoid allowing foreign material from entering the valve ports to give positive air seal.

In a typical application, supply air is connected to the normally closed port and the control device is connected to the common port. When the solenoid is energized, a magnetic field activates a plunger-type valve stem and supply air is directed to the control device. When the solenoid is de-energized, the supply air connection is closed and the normally open port exhausts air from the control device. Reverse action may be obtained by connecting the supply air to the normally open port, using the normally closed port for exhaust. (See Fig. 2.)

**Manual Operation**

The V11 may be manually operated independently of the electrical circuit. This makes it possible to actuate the pneumatic circuit for testing or checkout without closing the electrical circuit. To manually operate, remove the access plug and insert the key shown in Fig. 1. The manual opener key is not supplied as standard. Part No. Y99AA-4 key may be supplied separately at additional cost, when specified.

**Repairs and Replacement**

Field repairs must not be made except for coil replacement. The replacement coil is supplied with a cover and nameplate. For a replacement air valve or replacement coil, contact the nearest Johnson Controls wholesaler.

**Ordering Information**

To order, specify:

1. Complete Product Number.
2. If complete Product Number is not available, specify Type Number, voltage and other specifications not standard.
